SUMMARY OF THE REASONS FOR DECISION:

The untitled photographic material, also known as *Item 33 Sleeve containing a negative, and a photograph* is classified as:
Unrestricted.

The publication consists of a black and white photographic proof and its negative. Each individual image is quite small, in the manner of such photographic material. The proof and negative present a wide shot of two naked adolescent girls who have youthful physiques, girlish faces and youthful breast development. Their poses draw attention to their breasts by partially concealing them. The genitals of one of the girl's is visible. The dominant effect of the publication is romantic and aesthetic rather than overtly sexual.

While the publication exploits the nudity of young persons, it does not do so to an extent or degree, or in a manner, that would render its availability likely to be injurious to the public good. Consequently, no restriction is placed on the publication. The freedom of expression set out in the New Zealand Bill of Rights Act 1990 is not limited by this classification.
